LEAVE NO TRACE

Recommended parking bays

Motorcaravans are less than 2.5m wide thus a bay of 3.5m allows a unit parked in the centre of the bay to have .5m both sides.

A 2m gap between bays gives min of $.5 + 2 + .5 = 3\text{m}$ spacing.

As there are no external fixtures this achieves the min 3m fire break recommended by the Motorcaravan Overnight Parking Fire Safety Report.
